SUMMARY

Mobile application developer and Master's student at Ca' Foscari University of Venice. I developed CourtRise, an iOS basketball training app published on the App Store, and I build iOS and Android applications, including a cross-platform attendance system and a physics-based arcade game.

EXPERIENCE

Akıllı Otomat

Mobile Application Developer / Software Project Coordinator · October 2025 – Present · Istanbul, Türkiye

- Develops iOS and Android applications, with a focus on scalable, user-oriented solutions
- Contributes to web application development and backend integration
- Coordinates between technical and non-technical teams during software projects
- Takes part in software architecture planning and decision-making
- Oversees project timelines, task distribution and delivery milestones
- Is involved in product strategy and management-level technical planning

BilgeAdam Teknoloji

iOS Developer Intern · October 2024 – June 2025 · Istanbul, Türkiye

- Developed iOS applications using Swift and UIKit
- Worked extensively with list views and user interface components
- Gained hands-on experience with data fetching, processing and API integration
- Deepened understanding of iOS application architecture and best practices

Telpass

Software Tester · February 2024 – August 2024 · Istanbul, Türkiye

- Carried out software testing and quality assurance
- Identified, reported and documented software bugs
- Tested the chat applications Taksim Chat, Beurtelet Chat and Base Chat
- Worked with developers to improve software quality and stability

EDUCATION

Ca' Foscari University of Venice

Master's Degree, Computer Science and Information Technology · October 2026 – Present · Venice, Italy

Advanced studies in Computer Science, focusing on software engineering, system architecture, artificial intelligence and cybersecurity.

Istanbul Aydin University

Bachelor of Science in Software Development, Computer Science · September 2021 – July 2026 · Istanbul, Türkiye

A programme taught entirely in English, with a focus on software development, programming, mobile applications and web technologies.

SELECTED PROJECTS

CourtRise — Published on the App Store
CourtRise is a published native iOS basketball training application featuring adaptive drills, XP progression, player attributes, training statistics, and an optional Pro subscription.
https://apps.apple.com/tr/app/courtrise/id6760609447

GeoAttend — Active development
An independently developed native iOS and Android system for event management, organization workflows, secure attendance verification, and administrative reporting.

LineMaster — Playable prototype
An independently developed mobile arcade game featuring physics-based swinging, procedural environments, adaptive gameplay mechanics, daily challenges, and progression systems.

BuGunluk — In development, not publicly released
BuGunluk is a native iOS platform connecting students and young workers with flexible, short-term job opportunities. Built collaboratively with a small team, the application combines role-based experiences, job discovery, applications, employer management, and Firebase-powered workflows.

SKILLS

Programming Languages: Swift, Java, Python
Mobile Development: iOS development, UIKit, SwiftUI (intermediate), Flutter, Android
Backend and Data: Firebase, JSON
Developer Tools: Git, Postman
Software Engineering: Object-Oriented Programming, Analysing software specifications, Software testing

LANGUAGES

Turkish: Native · English: B2 (independent user)
